

RHC Debriefing Proforma

- Thank you all for staying for this debrief.
- This process will allow us to learn from this event, progress as a team and process what has happened.
- This is a confidential conversation, everyone's involvement is encouraged and questions are welcomed.
- I will review the case and then as a team we can discuss what went well and what we think could have gone better.
- Events like this can be emotive and stressful. Extra support can be accessed via the hospital chaplain, RHC's bereavement service or by speaking with me in confidence.
